PROJECTS

E-Commerce Website
- Designed and implemented a responsive website where one can browse , add , and purchase products seamlessly.
- Enabled a secure user authentication for sign-up and login,a dynamic product catalog with filtering option and a robust shopping cart and checkout system integrated with payment gateways for secure transaction.

Deployed Website on AWS EC2 using Virtual Server
- Hosted a fully functional website using AWS EC2 virtual server.
- Configured and managed a Linux-based instance to deploy the website.
- Secured server access using SSH and optimized performance.
- Integrated AWS services like S3 for storage, Route 53 for domain management, and CloudFront for faster   content delivery .
- Ensured high availability and scalability of the website.
